

### DRUM STORAGE ROLL TOP

**BENEFITS:**

- 100% polyethylene - no rust and corrosion
- Lockable Rolltop roof design
- Front swing open doors for easy access
- Forklift pockets for easy relocation (empty)
- Weather-resistant

**2 Drum Roll Top**

Sump capacity: 249L  
 Load rating: 2040kg  
 Dimensions: 1710(W) x 1050(D) x 1880(H)mm  
 Weight: 100kg

CODE	DESCRIPTION
46-DRT2	2 Drum Roll Top

**4 Drum Roll Top**

Sump capacity: 283L  
 Load rating: 4080kg  
 Dimensions: 1640(W) x 1570(D) x 2070mm(H)  
 Weight: 120kg

CODE	DESCRIPTION
46-DRT4	4 Drum Roll Top

### IBC STORAGE ROLL TOP

**BENEFITS:**

- 100% polyethylene - no rust and corrosion
- Lockable Rolltop roof design
- Front swing open doors for easy access
- Forklift pockets for easy relocation (empty)
- Weather-resistant

**Single IBC Roll Top**

Sump capacity: 1362L  
 Load rating: 3856kg  
 Dimensions: 1640(W) x 1570(D) x 2240mm(H)  
 Weight: 130kg

CODE	DESCRIPTION
46-IRT1	Single IBC Roll Top

**Double IBC Roll Top**

Sump capacity: 2025L  
 Load rating: 3629kg  
 Dimensions: 3250(W) x 1570(D) x 2440mm(H)  
 Weight: 250kg

CODE	DESCRIPTION
46-IRT2	Double IBC Roll Top

## Hazardous Goods Storage

The Health and Safety at Work (Hazardous Substances) Regulations (2017) have extended responsibilities for storing and safe use of toxins, corrosives and flammable goods.

While it may sound onerous, Vanguard Group's experts are available to help with advice and supply of compliant storage products.

In addition to workplace safety, and protection from liability, there are also potential gains to be made in productivity through having the detailed inventories, and storing products appropriately and close to work areas.

**For more information call Vanguard Group on 0800 500 147.**

**SOME THINGS TO HIGHLIGHT:**

- An up-to-date inventory of goods covered by the regulations must be kept, and must be available to emergency services
- Every workplace needs a detailed emergency plan, and all staff must be briefed on it
- It's recommended that unnecessary products be eliminated, and stock minimised, where possible
- Hazards should be isolated, and (PPE) personal protective equipment supplied and available.
