

RUBBER CORNER PROTECTORS

Rubber Corner Protectors are ideal for preventing damage to both vehicles and structures - particularly in building basement car parks where space is often restricted.

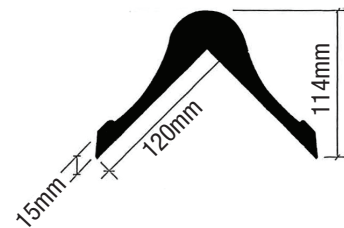

Available in standard or heavy duty 800mm long sections

Fasten with Easy Drive Anchors and Bondurox glue. 6 Fasteners required, allow 1 tube of adhesive per 8 protectors.

STANDARD

HEAVY DUTY

CARPARK PILLAR & WALL PROTECTOR

The Car Park Pillar and Wall Protector is a state-of-the-art innovation, designed and tested to withstand an impact of up to 5km per hour with no damage to the vehicle or pillar. Can be supplied plain, or printed with required branding or advertising. The zipper joiner makes it very easy to install or remove.

BENEFITS:

- Can be printed with your message or corporate identity
- PVC Sleeve and the high density foam is fire retardant and waterproof, making it safe for everyone
- Standard product is 30mm thick
- Environmentally friendly - the high density foam is made from 100% recycled materials.

Size: Circumference of pillar, or length of wall x 1500(H)mm
