

Cityflex Ø8 range

Vanguard's CityFlex Post is a product designed for delineation on roads, parking areas and bike paths. It operates as a deterrent, reducing the risk of road accidents and providing clear and aesthetic separation on the road. Due to the manufacturing method and material, the CityFlex post provides full flexibility, returning to its original form after an impact. Available in a range of different colours for aesthetic delineation.

Cityflex Bollard

## EASY APPLICATION

### PROCESS

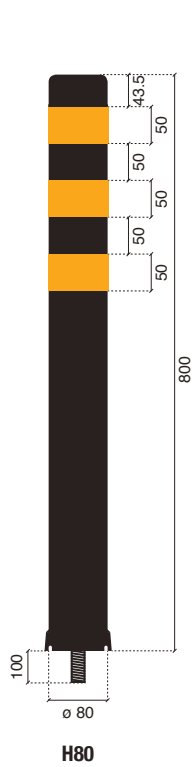

1. Drill a hole with 100mm depth;
2. Thoroughly clean;
3. Insert chemical glue in the hole - bottom to top;
4. Fix the bollard in the hole with the metallic sleeve attached;  
*for removable use: apply the bollard with 1mm PVC pad (supplied)*
5. *for permanent use: apply the bollard without 1mm PVC pad.*
5. Allow to dry fully before use.

### EQUIPMENT

- › 24mm drill bit
- › Epoxy
- › Metallic Sleeve Ø22mm X 100mm  
*Included with the Bollard*
- › Smart Key for easy removal  
*Not included with the Bollard*
