

The Vanguard Rubber Pedestrian Crossing is a modular system which allows you to create a '2 in 1' pedestrian crossing and speed hump. These crossings create a visual and safe place for pedestrians to cross, and also acts as a speed calmer. If you struggle to get paint to last on a rough and unsealed surface then this is a good solution for you.

Bolt-down modular design ensures quick and easy installation and allows for removal or relocation if required. This system is a great alternative to asphalt - rubber construction conforms to uneven surfaces. 500mm long modular sections join together to create your desired length with quick and simple installation.

Supplied in kit sets of 6 metres. Supplied with fasteners and dog bone connectors.

► SPECIFICATIONS

Code:	49-PED
Description:	Rubber Pedestrian Crossing - 75mm(H)
Material:	Recycled Rubber
Height:	75mm
Width:	500mm
Length:	500mm

6.0m(L) x 3.0m(W) x 75mm(H)

Consists of:

- 20 x Black Middle Sections
- 20 x White Middle Sections
- 28 x End Caps
- 4 x Corner Pieces

► BENEFITS

- Quick and easy to install
- Removable / re-useable
- Raised stud creates a non-slip surface for a safe pedestrian crossing
