

Height Restriction Bars

Ideal for carparks and other areas with limited ceiling height.

Height Restriction Bar

Height restriction bars offer an ideal early warning system for vehicles approaching low clearance hazards. Eliminate damage to vehicles and property caused by oversized vehicles entering areas of restricted height. Height restriction bars are high-visibility for drivers and will make an audible sound if hit by vehicles above maximum allowable clearance.

- Made from 100 x 50mm Galv Steel section
- Powder-coated Safety Yellow
- Comes with D-shackles and eye bolts ready for mounting. Chain also available on request
