

Mini Socket Stanchion

Mini Socket Stanchion

Mini Socket Queuing Stanchions can be installed in seconds by simply screwing into the in-ground socket. Posts can be reconfigured or removed to allow the floor area to be used for other requirements. Maximises floor space by removing the need for a weighted base.

- Internal spring - allows post to flex up to 10 degrees
- Small plastic plug inserts into ground socket when not in use
- Versatile four-way connectivity
- Height: 1000mm
- Post Diameter: 65mm
- Belt length: 2.5m
- Indent item

Mini Socket Stanchions have a more sleek design than free-standing alternatives, saving space and creating a tidier look.

Post screws into receiver holes for instant use leaving no surrounding base as a tripping hazard.
