

# Bollards - Stainless Steel

These bollards provide protection in areas where aesthetics need to be considered.

101Ømm

152Ømm

## Stainless Steel Bollards

Stainless Steel Bollards offer a high level of protection and are particularly suited to areas where aesthetics are important.

Stainless steel provides long-term good looks and resistance to corrosion, making them a great option for outside shopping centres, marine environments, and food-grade factories and warehouses.
