

Energy Absorbing Bollards

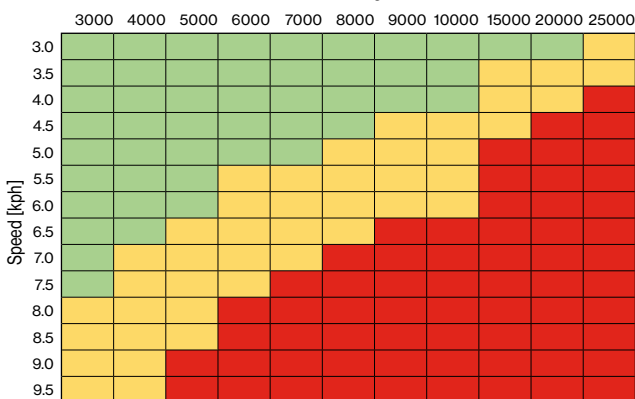

Slowstop® Bollard - 141mm Dia

Protect buildings, assets, vehicles, and pedestrians from damaging collisions. Used in medium to heavy-duty industrial applications where cars, light trucks, and typical forklifts are present.

This flexible steel bollard stops 3,000 kg at 7.8km/h without damage.

New round base design on this size offers fastener head protection from fork impact as well as eliminating trip hazards.

Stopping Power Rating: 14.000 joules | 90 kN.

■ Will arrest/minimal damage
 ■ Significant damage/potential failure to arrest
 ■ Barrier is undersized

Made in USA
