

Energy Absorbing Bollard - 60km/h

TESTED & CERTIFIED ✓

Energy Absorbing Bollard - 60km/h

Designed to control errant vehicles weighing up to 1600kgs and travelling at 60km/h, this bollard is crash-tested and can be relied upon to reduce the amount of damage that occurs when an errant vehicle attempts to enter a pedestrian-dense area.

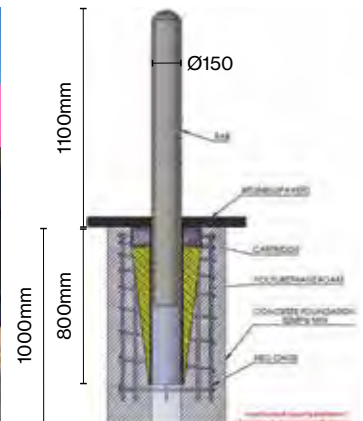

- Fully crash-tested with a 1600kg vehicle at 60km/h
- Protects pedestrians and assets
- Reduces the risk of injury to the vehicle's occupants
- Energy absorbing
- Does not interrupt pedestrian flow

Ideal for:

- CBD intersections
- Shopping complexes
- Outdoor dining
- Critical infrastructure protection
