

# Dock Guards

## Extruded Rubber Dock Fender

Our Extruded Rubber Dock Fender is suited to protecting docks, structures and vehicles from damage. Tough and durable EDPM rubber with a wall thickness of 19.5mm can withstand the most harsh environments, including being affixed to moving vehicles. Comes in 2.4m lengths without holes. Can be cut and drilled on site as required.

CODE	DESCRIPTION	SIZE (mm)
49-ERF	Extruded Rubber Dock Fender	2400(L) x 105(H) x 92(D)

## D Type Moulded Rubber Dock Fender

Heavy duty hard rubber dock bumper with a non-flexible moulded rubber compound to save damage to your building and vehicles.

'D' Section Fender comes in 900mm lengths with a wall thickness of 25mm. Mounting holes are pre-molded.

CODE	DESCRIPTION	SIZE (mm)
49-DF100	D Type Moulded Rubber Dock Fender	900(L) x 100(H) x 100(D)

Also available by indent in 2.4m long, 200 x 200mm.

## Rubber Dock Bumper

Heavy duty rectangular dock bumpers are the ideal solution when used as independent blocks for docking trucks and other vehicles.

Made from fibre-reinforced solid rubber with an in-built compression feature.

Come as 330 x 250mm blocks and 100mm thick. Mounting holes are pre-molded.

CODE	DESCRIPTION	SIZE (mm)
49-DB500	Rubber Dock Bumper	450(L) x 250(H) x 100(D)
