

# Bird Spikes, Reflective Tape & Chain

## Bird Spikes

Application of this system provides an effective, permanent solution to protect ledges, conduit, nesting areas, large flat surfaces and even curved surfaces from bird landings. They repel all birds including pigeons and seagulls.

Each set is manufactured from stainless steel spikes set into a UV-protected polycarbonate base. They are available in 500mm(L) sections, clip together for high strength, and easily install with adhesive or fasteners.

Installed in any area, even under the most extreme conditions, these bird spikes will not deteriorate or rust.

CODE	DESCRIPTION	SIZE (mm)
50-BS	Bird Spikes	500(L)
50-BSS	Adhesive Sealant - 300ml Tube*	

\*Each tube of sealant adheres to 12-16 Bird Spike lengths.
