

# Trench and Hole Covers

TESTED & CERTIFIED ✓

## LowPro Safe Cover 15/10

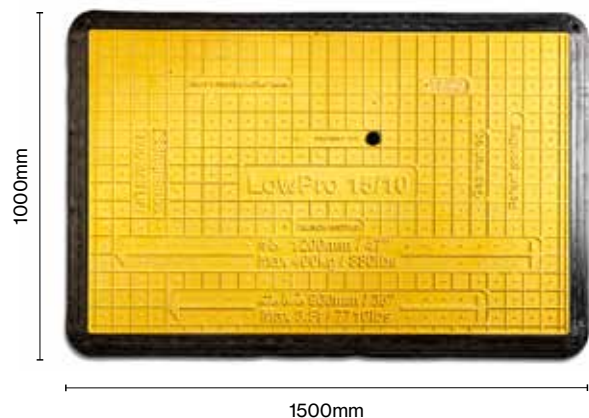

A great alternative to heavy steel plates, our composite LowPro Safe Covers don't require any lifting equipment to use. Simply hand-lift them into place.

Ideal for covering trenches/holes across driveways or areas that require vehicle access. Rated to handle the distributed weight of a 3.5T vehicle over a 900mm span.

- LowPro rubber edging prevents covers from moving on the ground, eliminating chipping/cracking on the edges, and providing a smooth ramp for wheelchairs/mobility scooters
- No lifting equipment required.
- Central section made from fibreglass-reinforced composite with embedded steel frame
- Non-conductive
- Can be embossed with company name or logo for corporate identity (MOQs apply)
- Tested and certified anti-slip surface
- Gas probe access

Two-person lift, can support a 3.5T distributed load.

Made in UK
