

Hole Covers

TESTED
& CERTIFIED ✓

Safe Covers are ideal for covering holes on footpaths without using obstructive barriers.

Safe Cover 12/8

The Safe Cover 12/8 is a cost-effective alternative to the LowPro Cover performing the same function but with a lower weight capacity and without rubber edging. They are designed primarily for use on the footpath over trenches and holes. Recommended for trenches up to 700mm wide - max 500kg weight rating.

Made from a single piece of reinforced composite fibreglass that is moulded around a steel frame, Safe Covers offer strength and safety at far less weight than steel plates when bridging holes over footpaths.

- Slip-resistant surface and bevelled edges to prevent tripping
- Low profile - only 25mm high
- Underside has ribbed framework for added strength
- Only 15 kg - no machinery required to lift
- Can be embossed with company name or logo for corporate identity (MOQs apply)

Made in UK
