Safe Cover 16/12

The 16/12 Safe Cover is a cost-effective alternative to the LowPro 15/10 Cover, performing the same function but without rubber edging, and a lower weight capacity. They are designed primarily for use on the footpath over trenches and holes. Recommended for trenches up to 900mm wide - max 500kg weight rating.

Made from a single piece of reinforced composite fibreglass that is moulded around a steel frame, Safe Covers offer strength and safety at far less weight than steel plates when bridging holes over footpaths.

- Slip-resistant surface and bevelled edges to prevent tripping
- Low profile - only 25mm high
- Underside has ribbed framework for added strength
- Only 33 kg - no machinery required to lift
- Can be embossed with company name or logo for corporate identity (MOQs apply)

Made in UK

| CODE | DESCRIPTION | SIZE (mm) |
|-----------|------------------|---------------------------|
| 49-SC1216 | Safe Cover 16/12 | 1600(L) x 1200(W) x 25(H) |

Safe Covers offer a safe, slip-resistant passage through footpath works for pedestrians and small vehicles like motor scooters.
