

## Road Plate 23/05 - 1200mm trench span

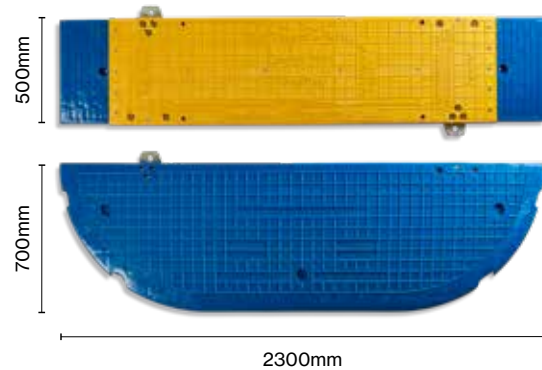

Composite modular Road Plates are the perfect alternative to heavy steel plates; improving safety and efficiency. Individual modules link together, allowing you to adapt to whatever trench or hole you need to cover. Each module weighs 65kg, allowing the entire installation to be complete by 2 people.

Rubber edging eliminates the need to pour asphalt edges on the ramp approach, saving time and money and providing a safe transition for vehicles.

- Tested and rated for 44 tonnes over a 1200mm trench span
- Two-person lift – no machinery required.
- Moulded anti-slip surface
- Drop pins prevent plates from shifting along road
- Slows traffic for increased safety through worksites

CODE	DESCRIPTION	SIZE (mm)
49-RP235MB	23/05 Road Plate Centre Module	2300(L) x 500(W) x 96(H)
49-RP235EB	23/05 Road Plate End Cap	2300(L) x 700(W) x 96(H)
49-RP235H	Road Plate Lifting Handle	
49-RPS	Road Plate Stillage - Stores 8 Modules and 2 Ends	

Lifting handles for two-person movement. No lifting machinery required.

Forkliftable Stillage for efficient transport and storage.
