

# Composite Road Plates

TESTED & CERTIFIED 

## Road Plate 15/05 - 700mm trench span

Composite modular Road Plates are the perfect alternative to heavy steel plates; improving safety and efficiency. Individual modules link together, allowing you to adapt to whatever trench or hole you need to cover. Each module weighs 42kg, allowing the entire installation to be complete by 2 people.

Rubber edging eliminates the need to pour asphalt edges on the ramp approach, saving time and money and providing a safe transition for vehicles.

- Tested and rated for 44 tonnes over a 700mm trench span
- Two-person lift – no machinery required.
- Moulded anti-slip surface
- Drop pins prevent plates from shifting along road
- Slows traffic for increased safety through worksites

Road Plates stack compactly for efficient transportation.

CODE	DESCRIPTION	SIZE (mm)
49-RP155M	15/05 Road Plate Centre Module	1500(L) x 500(W) x 75(H)
49-RP155E	15/05 Road Plate End Cap	1500(L) x 500(W) x 75(H)
