

# Rubber Cycleway Islands

Rubber Cycleway and Traffic Islands are modular allowing you to create sections of any length.

## Rubber Cycleway Islands

Modular rubber sections allow for fast, easy construction of small traffic islands or lane separation. More cost-effective than permanent materials, allowing you to install separator devices at a lower cost for short and medium duration projects, while still being effective and aesthetically pleasing.

Bolt down design allows for adjustment or removal if required - which is quick and easy - saving on time and labour. Reflective beaded edges adds reflectivity for night conditions along with prismatic reflector in end caps.

Ideal for:

- Cycleway separation
- Lane separation
- Pedestrian refuge islands
- Intersection lane control
- Splitter islands

CODE	DESCRIPTION	SIZE (mm)
49-RCIM55-G	Cycleway Island, Centre Module - Grey	500(L) x 500(W) x 130(H)
49-RCIE55-G	Cycleway Island, End Module - Grey	500(L) x 500(W) x 130(H)

Fixings all included.
