

Flexible Barrier Self-Closing Gates

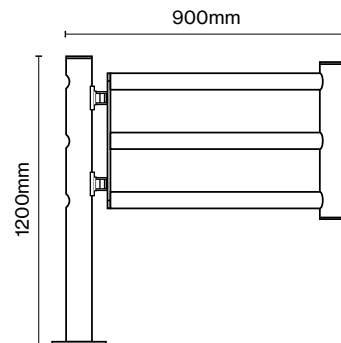

d-flexx Self-Closing Gate

d-flexx Swing Gates bring pedestrians to a stop before stepping out into busy traffic thoroughfares.

Our **d-flexx** Self-Closing Gate can be installed alone, or incorporated into our **d-flexx** Barrier systems.

They create pause points along walkways to guide pedestrians and stop people from abruptly stepping out in to active areas. Top quality adjustable hydraulic hinges reduce maintenance, and increase longevity.

A high visibility green egress at the end point makes the push/pull side clear to pedestrians.

CODE	DESCRIPTION	SIZE (mm)
DFJU-80	d-flexx Self-Closing Gate	800(W)

Fasteners included.
