

Cycle Hold Rails

Cycle Hold Rail shown without Tapping Rail.

Supplied with ground sockets.

Cycle Hold Rails

Pedestrian Cycle Hold Rails, also known as Pedestrian Refuge Rails or Pedestrian Resting Rails, provide a place for pedestrians or cyclists to wait before they can cross a lane. Rails can be supplied with the option of a tapping rail for the visually impaired (shown above).

- Supplied with 500mm(L) inground sockets for frangible design allowing for rail replacement if damaged
- Galvanised & powder-coated Yellow or White
- Reflective conspicuity tape for visibility
- Overall height: 1300mm
- Height above ground: 1000mm

CODE	DESCRIPTION	SIZE (mm)
