

Dockway Barriers

Dock-PRO Folding Barrier - Standard. In open position.

Dock-PRO Folding Barrier - Standard. In closed position.

Dock-PRO Folding Barrier - Bifold. In half open position.

Dock-PRO Folding Barriers

Dock-PRO Folding Barriers are designed to prevent people and equipment from falling into recessed dock areas, off platforms or into service pits.

The unique, compact, lift-away design can be raised easily and nested out of the way, overcoming the need to keep swing areas clear. It's a great way to save space and keep your team safe.

If ceiling height is limited, the Dock-PRO Bifold unit can be used, protecting wide openings with minimal height required.

Dock-PRO Folding Barrier - Standard

Minimum ceiling height: 3820m

Dock-PRO Folding Barrier - Bifold

Minimum ceiling height: 2300m

Dock-PRO Folding Barrier - Bifold. In closed position
