

# Portable Belt Barriers

Steel cage protects belt.

Large wheels for easy movement.

## Safe-Zone Belt Barrier - 6m & 9m

The Safe-Zone Belt Barrier consists of a steel bollard with wheels and a weighted base, containing a 6m or 9m long webbing belt. Used in operational areas to create temporary exclusion zones or driver safe zones.

- Rated for outdoors
- Built-on handle for ease of deployment
- Protection cage prevents belt head from being damaged if unit is knocked over
- Magnetic end included for connecting to steel surfaces
- Bollard size: 1000(H) x 115mm(Dia)
- Available in 6m or 9m belt options
