

Portable Belt Barriers

Port-a-Zone Belt Barrier - 56m

This guidance system is a robust and safe solution for directing pedestrians and vehicles.

The Port-a-Zone is a high-visibility unit featuring a hand-wound mechanism for easy deployment. With 2 x 28m long woven belts you can quickly cordon off any area up to 56m. When required, the unit can be positioned and then extended in two directions to form a high-visibility guidance barrier.

- Creates long length visual barriers to restrict access
- Quick to manoeuvre & deploy - only requires one person to operate
- Manual tensioning system prevents belt-sagging

Quickly create exclusion zones of up to 56m.

Comes with karabiners for quickly affixing end points.
