

# Interlocking Speed Cushion - 50mm high

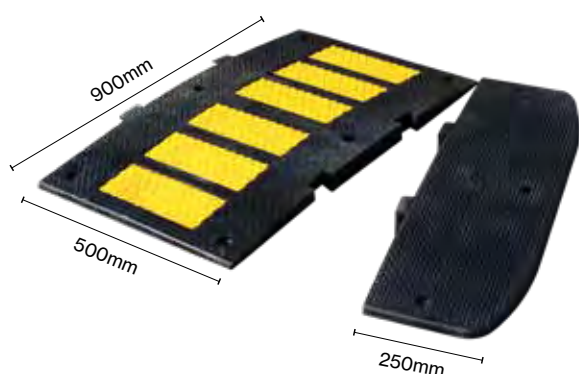

Used in shared areas for cars and trucks.

## Speed Cushion - 50mm High

Used for areas where trucks are present on a regular basis. The speed cushion disperses the weight load and is also forklift-passable. Ideal for heavy traffic areas and where a low impact speed calmer is required.

- Convenient interlocking system can be configured to any length
- Can be relocated if required
- Middle sections feature hi-vis yellow panels

Easily bolted down on concrete or bitumen with basic tools.
