

Speed Cushion Pads

The modular design allows custom configurations as required.

Slows traffic with minimal impact to buses, emergency vehicles and cyclists.

Speed Cushion Pads - 2m & 3m

Speed Cushion pads are used to slow vehicle traffic on roads. Unlike speed humps, the speed cushion pad does not extend across the entire width of the road so has minimal impact for buses, emergency vehicles and cyclists. Rubber Speed Cushion Pads are made from recycled rubber which is lighter and easier to work with than asphalt and concrete, and can be easily installed with basic tools.

- Quick and easy installation
- Embedded reflective material increases visibility and safety, day or night
- Extremely durable
- Flexible - conforms to road curvature

CODE	DESCRIPTION	SIZE (mm)
49-SCP2	Speed Cushion Pad - 2m	1800(W) x 2000(L) x 65(H)
49-SCP3	Speed Cushion Pad - 3m	1800(W) x 3000(L) x 65(H)
49-CF10100	Fasteners	Concrete M10 x 100 Anka Screw
49-FBL	Fasteners - Bitumen	M10 x 100 C/Screw and Plug
49-FR12	Fasteners - Chipseal	M12 x 300 Spike

20 fasteners per 2m Speed Cushion Pad, 32 fasteners per 3m Speed Cushion Pad.
