

Suggested Uses.

- Delineate pedestrian walkways
- Restrict access to dangerous areas on worksites
- Create exclusion zones on worksites.

Benefits.

- Non-conductive plastic to keep your worksite and the public safe around live sites
- 18kg recycled plastic base – no water required
- Can be easily stored and transported, up to 18 units per pallet
- More stable in high winds compared to other barriers.

Useful Tip.

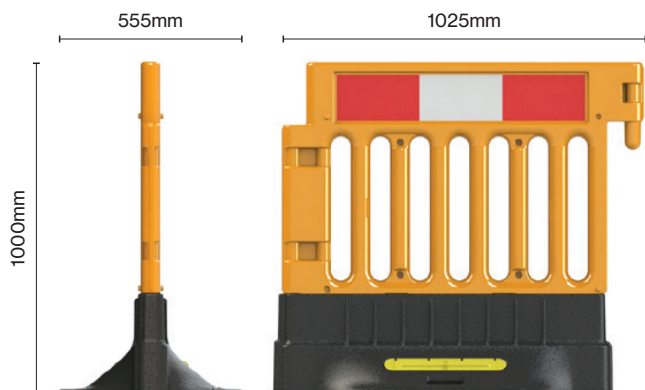

These are an excellent option for setting up safe walkways when you can't bolt something to the ground.

Specifications.

Code	49-SW
