

## Suggested Uses.

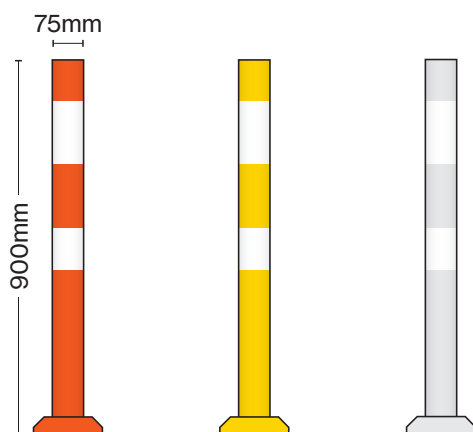

- Temporary or permanent delineation on roads, carparks, and cycleways

## Benefits.

- Manufactured in NZ from highly durable urethane
- 2 part base and post design with push fit allows for easy post replacement if damaged.
- NZTA Approved road device, can be used for temporary traffic management as well as a permanent delineator.
- Most durable post of its type in NZ, rated for up to 100hits at 100kph.

### Useful Tip.

For temporary road layouts or low traffic zones you can use butyl adhesive peel and stick pads. This makes installation quick and easy, but doesn't offer the durability of bolts or anka screws.

## Specifications.

Code	49-UFP
Description	Ultraflex Delineator
Material	PU (polyurethane)
Height	900mm
Post Diameter	75mm
Base Diameter	165mm
Weight	1.4kg
Fixings	4 fixing points per base
