

## Our Story

Since 1991, Vanguard have been at the forefront of safety in New Zealand.

We continue to stand between people and risk in commercial, construction, retail, civil and roading. Whether it's protected walkway areas in warehouses or speed bumps in motel driveways – we'll be there because our job is to safeguard everyone.

That means a continuous commitment to improvement and innovation. Which we've done since day one when the McLean family started supplying line marking paint to schools and factories.

It's a vocation. And something our family company is totally dedicated to.

We listen carefully to our clients' needs and match them to the best safety solution available. And, because people come first, our team have a strong client service focus, great communication skills, industry experience, and are passionate about what they do.

Above all, we want to help protect all Kiwis.

The SAFEST  
& most  
environmentally  
responsible  
paint globally!

## SOPPEC SPOT MARKING PAINT THAT PROTECTS EVERYONE

Spot marking paint has come a long way since Vanguard began in 1991 supplying contractors NZ wide.

Today SOPPEC gives you a way to create clear communications that don't compromise the health of staff, communities, or the environment.

- No harmful components, carcinogens or skin irritants
- No CFC's or HFC's to damage the Ozone layer
- Non-clogging formula - guaranteed to empty completely 100% saving time and money
- Most fluorescent and visible marker paint on the market

SOPPEC is backed by a QSE integrated management system based on three certifications – ISO 9001 for Quality, ISO 14001 for the Environment and OHSAS 18001 for Health and Safety.

# Standing between you and harm

## BREATHE EASIER WITH SOPPEC – PROTECTING YOU AND YOUR FAMILY

The safest paint formula globally, SOPPEC complies with strict EU Environment regulations and has no harmful components, no carcinogens, mutagens or toxicity to reproduction cells. It is also environmentally and aquatic life friendly, and with no CFCs, is easy on our ozone layer

SOPPEC has no skin irritants in its formula, however, an inbuilt shield still guards against the familiar problem of painted fingers.

The patented SOPPEC safety twist-cap is safe and comfortable to use, stops the accidental discharge of paint, and also the risk of discharging flammable gas into the backs of vehicles. The smash resistant cap is very strong and can sustain a drop from 1.5m.

### MARKING DURATION

Rapid drying time (10mins) and superior coverage. Available in short term (2 months Tempo TP) or long term (12 months Fluo TP & Promarker). Can be applied in temperature range of -20°C to 50°C.

### GUARANTEED TO EMPTY

Large 500ml can is guaranteed to empty completely with no clogging. This means zero wastage of paint and time.

### SAFETY TWIST CAP

Twist to unlock
