

Mini Rubber Roundabout

The perfect solution for creating roundabouts at small intersections to improve traffic flow and safety. Fast, easy assembly, consisting of 8 x sections that slot together to form a roundabout 3m in diameter. Made from UV resistant, recycled rubber, with 3M reflective tape and glass eyelets for visibility at night.

Bolt-in design significantly reduces installation time compared to concrete/asphalt methods, and means less disruption to traffic.

For intersections requiring larger diameter roundabout, consider using additional products such as [speed humps](#) and [line marking paint](#) to extend the diameter.

Code	Description	Diameter (mm)	Height (mm)	Weight (kg)	Fixings	Colour*
49-RR3	Mini Rubber Roundabout 3m	3000	30-120	600	48 x screws, 24 x steel connectors	Red
